

JOB OPENING

Tenured/Tenure-Track Faculty Positions in Metallurgical and Materials Engineering

Golden, Colorado | Full-Time Academic Faculty

Multiple ceramics and glass positions are sought within two cluster areas: (1) Sustainable Energy and Power Systems, and (2) Semiconductor Devices. Qualified candidates are sought to grow research and education broadly in ceramics and glass and contribute to the growth of Mines in the cluster areas.

Topical areas include functional and structural ceramics for energy technologies and infrastructure with emphasis on sustainable manufacturing, processing, integration and/or modeling; as well as development of materials to extend the capabilities of semiconductor devices including fabrication, integration, and characterization. More information can be found at ceramics.mines.edu, metallurgy.mines.edu and materials.mines.edu.
